Re: RWP rolling ladder stand certification

To whom it may concern:

This letter is to confirm the RWP rolling ladder stands produced and marketed by Canway Equipment Manufacturing Inc. (Canway) complies with the basic requirements of ANSI-ASC A14.7-2 (Safety Requirements for Mobile Ladder Stands and Mobile Ladder Stand Platforms), in that they have been tested to ensure the wider treads and platform have the strength requirements required by the standard, specifically clauses 4.2 – Load Rating, and 5.3 - Load Testing. The testing was performed so as to increase the capacity of the ladder stand to match the larger area.

The initial certification of the ladder stands are sealed by Anthony Mulholland. The ladders certified were the 16SH – 2SH, with the number indicating the number of steps.

The rated capacity of the ladder stand 2SH-RWP to 16SH-RWP is 800 lbs (363 kg) or **2 persons**, as noted on the sealed drawings and the label affixed to the unit. The following are basic notes that apply to the safe use of the ladder stands, they are not intended to replace the instruction manual and safety notices provided with the equipment:

- Only trained personnel should use the platform. Users should be fully aware of all warnings and conditions of use that are outlined on this drawing, labels, and users work instructions.
- Only one person shall occupy the stairs at any given time, and two can occupy the top landing.
- Users of the custom rolling ladder should not carry heavy material up and down the ladder.
- The platform intended purpose is to provide access to locations that require maintenance or service.
- The platform design has not been reviewed for compliance with the Building Code as it is not considered to be a "platforms or walkway" as defined in the Building Code.
- Where required, fall arrest equipment should be used. It is the responsibility of the user to determine when fall arrest equipment is required.
- The intended use of the platform is to provide frequent access to equipment as per section 19 of Ontario regulation 851.

Should you have any question or concerns please contact us and we will be happy to assist you.

Sincerely,

Anthony Mulholland P.Eng.
